provide
general insights on approaches to perceived **performance** improvement.

...TEXT: oil company, that had tried unsuccessfully for ten years to
improve customer satisfaction by measuring **performance** and improving
supplier reliability. Management then employed a somewhat broader
approach
to improving purchasing **performance** in the area of capital equipment
purchases: interacting more closely with internal customers.

To evaluate...

...by purchasing. The experiences of this purchasing organization
provide
general insights on approaches to perceived **performance** improvement.

While changes are occurring in many companies with respect to the
strategic
use of...

...describes how purchasing management in one division of an oil
company
moved from a passive, **supplier** -based improvement approach to a more
active, customer-based approach (see Figure 1). (Figure 1...

...for the delays, in public the team members blamed a politically
neutral,
generalized "other"--the **supplier** . To investigate this hypothesis, a
sample of 500 closed purchase orders were analyzed for on time

delivery

performance . The analysis revealed the same situation that was found in 1985 (see Table I)--suppliers were reliable, but the **supplier** 's promised delivery date differed from the customer's required date shown on the purchase requisition. Rather than pointing to a **supplier** problem, the analysis pointed to a long-term, chronic communication problem between purchasing and its customers. Purchasing's customers were planning **start** dates for projects, programming equipment replacements, and scheduling preventive maintenance on the assumption that the...

...requested. The buyers, on the other hand, seldom compared the customer required date with the **supplier** promised date, and did not communicate with the customer when the two dates differed.

The...

...2. Purchasing would notify customers about any discrepancy between the customer required date and the **supplier** promised date, and customers would adjust their operational plans according to the promised date.

3. Purchasing would prepare and distribute a monthly **report** on the status of all capital equipment purchase orders, by customer. Changes in and deviations...

...would meet quarterly with the division manager to monitor capital equipment purchasing budget compliance and **performance** .

To monitor the effects of the proposed changes, purchasing redefined on-time material delivery **performance** and began tracking it and capital equipment budget compliance. On-time material delivery was defined... company's procurement department and on research performed by Hendrick and Ruch(3) to determine **performance** appraisal criteria for buyers. The questions highlighted seven main areas for customer-oriented purchasing performance :

1. Service
2. Accuracy
3. Communication
4. Responsiveness
5. Professionalism
6. Technical knowledge
7. Customer...

...purchasing manager, two purchasing supervisors, and a senior buyer.

The Appendix includes the 18 closed- **end** and four open- **end** questions asked in the survey. The closed- **end** questions were rated on a four-point scale: 1) always; 2) most of the time...

...managers who tended to be satisfied (always, most of the time); the other included the **percentage** tending to be dissatisfied (sometimes, never). A simple average **percentage** figure was calculated for each main area of inquiry (e.g., service, accuracy, communication).

The...

...area proved statistically significant, the Northern Division managers who responded to the survey rated purchasing **performance** higher than their Southern counterparts, regardless of the area surveyed. In addition, the fact that...

...with the Southern Division, the current effort appears to have succeeded in improving purchasing's **performance** in the areas of responsiveness and professionalism, but not in the area of overall service...s technical knowledge unaltered, the current effort left untouched the other three purchasing subprocesses. Poor **performance** in those areas could create biased perceptions of value added in the capital equipment area...

...it difficult for buyers to provide timely, reasonable explanations for delays). Responses to the open- **end** survey questions provided a partial explanation for this lack of communication: buyers do not have...

...FIRM'S EXPERIENCE?

The experiences of this purchasing organization provide four general insights on purchasing **performance** improvement that may be useful to purchasing managers in other organizations.

1. What can be...

...this purchasing organization's past and present efforts is a continued attempt to improve its **performance** by moving farther upstream in the acquisition process. Its initial efforts focused on suppliers; its...

...needed--and buyers should perceive a legitimate need and application for that training.

Improving purchasing **performance** -much like improving other functional areas and processes-may require nothing more than a continued walk than thoughtful process. Participative, **performance** improvement planning processes that link improvement objectives to action should prove

itself
here.

Abstract

WORD COUNT: 5368 LINE COUNT: 00431

ABSTRACT: The grocery industry should come up with new **performance** measures to sustain the benefits of implementing Efficient Consumer Response (ECR) programs. Externally-based **performance** standards are also important in this undertaking, as well as modifications in existing compensation and incentive schemes related to **performance** . Companies should also focus on continually reengineering their processes, technology and personnel management to fully...

TEXT:

...and gross profit are threatening to hold ECR back. Struggling to come up with new **PERFORMANCE** MEASURES, the grocery industry seems to have an.....

The development of new **performance** measures is one of the critical hurdles that must be crossed to keep ECR moving...

...ECR progress have been hindered because we do not have a properly aligned set of **performance** measures in the supply chain today," comments Charles Troyer, partner in the consumer goods practice...

...of activities and strategies across functional boundaries, and across the supply chain. This requires new **reporting** and measurement systems that can accommodate such holistic, global views of activities.

The "C" in ECR is another consideration driving the search for new kinds of **performance** measures.

"The measures most companies in this industry have traditionally used to evaluate **performance** have been internally focused, such as gross margin and gross profit," consultant Frank Grossi, general...

...enough simply to incorporate such intentions in strategies and mission statements, then to continue measuring **performance** with the same old functional, internally-based systems, experts stress.

"It's a truism," points...

...t get it."

In fact, companies need to go another step, and not just change **performance** measures, but also change compensation and incentive systems tied to **performance**, consultants point out.

"Most people tell you that what you measure is what gets done...

...have to change your reward systems."

Many in the industry feel progress in instituting new **performance** measures is lagging behind other aspects of ECR implementation - a situation, as Troyer points out...

...retailers want to build their business."

This points up a second critical role for new **performance** measures.

Not only are they needed so companies can assess their success on the new

...

...the customer may be indifferent to the benefits of a CRP versus a non-CRP **supplier**. But when you measure all the cost components, it would probably become clear that the...

...slowly.

"We've spent a lot of time trying to analyze the process of

measuring

performance , and just that aspect - how we think about **performance** measures - is something we've made significant gains against," observes Tom

Christal, president of the...

...the number of issues that must be dealt with to move forward with changes in **performance** measures. These include process issues, technology, and perhaps most important, the people issues.

"Whenever you...KPMG. "The first is internal. Companies are starting to look at their traditional labor-based **performance** measures and are beginning to incorporate new measures like cycle time and quality, to get

...

...to see some process measurements that are not only cross-functional, but cross-company. Measuring **performance** from the customer's perspective is one classic example that is starting to come into...

...example, are using the concept of "the perfect order" as a way of measuring their **performance** from the standpoint of the customers' needs.

Companies are also starting to institute measures that...

...objectives," he comments.

Balanced Scorecard Approach

One key in helping companies approach development of new **performance** measures required to support ECR, several consultants say, is the concept of the balanced scorecard...

...of perspectives from which success can be measured and laying out specific frameworks for evaluating **performance** in each area. It creates the explicit point of connection between a company's strategies...

...metrics to measure those three things. The only way management measured themselves was on financial **performance** .

"A balanced scorecard says we'll still measure ourselves financially, but if we want to...

...What are the opportunities it wants to maximize?

The next step is determining the key **performance** indicators that show how well it is doing in achieving these objectives.

Balanced scorecards are...

...area of strategic importance. Within each quadrant would be listed the three or four key **performance** indicators that can be used to measure success in each area.

"If customer satisfaction is...

...that determine how you're achieving customer satisfaction. For a distributor, one indicator might be **percentage** of on-time deliveries, or order fill rate.

"Another area of the scorecard," says Eschenburg...

...be another area on the scorecard that relates to distribution or customer-service-related key **performance** indicators, or KPIs.

"If one of your core competencies is distribution, you might have a quadrant that describes your distribution function, looking at metrics for **performance** inside a warehouse, such as dollars generated per square foot.

"You may also include some...

...companies in the grocery supply channel do business, the areas in which new forms of **performance** measures are required are also virtually global in scope.

* BUYING

One of the first areas where companies need to go beyond traditional

performance measures is in the buying function, Troyer comments.

"This includes any buying function," he adds...they may have to purchase in quantities that make inventory costs very high. With another

supplier, on the other hand, you may not make as much gross margin on the product...

...with the new approach to purchasing efficiency, the emphasis is on profitability analysis.

From the **supplier** standpoint, the move is toward customer profitability analysis: loading the true cost to serve against...

...could slap trade dollars around and incent somebody to load up on inventory at the **end** of the quarter," Troyer observes.

"We're moving toward an environment where companies are focusing...

...joint business planning process under category management. They are rated and paid based on their **performance** against these objectives.

So a

big part of what sales is now measured and rewarded...

...responsible for making profitable sales, for example, but when they need

to make that quarter- **end** goal, it's still tempting to give them the money

to bring in the business...

...in order to reduce costs in one area simply raise costs in another.

"You need **performance** measures in place that align internally to create the lowest blending of cost," he points...plans.

"So the planning process is giving us the tools we need to adapt our

performance measurement scorecards," he points out.

On the sales management side, CSC's Troyer observes, "We...

...sales function to create business-building partnerships with customers, not just selling product.

"To this **end**, we're starting to see ABC being used, especially by companies that are in alliances...

...of its developing partnering alliance program, Schultz notes, Nabisco is instituting a number of new **performance** measures for its customer alliance team.

"Included are standard measures such as case fill, on-time delivery, and order cycle time to the customer. But we'll also **start** to track such indicators as our spoilage rate with each customer, our deduction balance with...

...and complete.

"The way to actually calculate this measure," he adds, "is to multiply the **percentage** achieved in each of the four elements to yield the perfect order percent."

If, over a given period, for example, a **supplier** delivers 90 percent of orders damage-free, 90 percent on-time, 100 percent complete, and 100 percent as ordered, its perfect order **percentage** would be 81 percent.

"When done this way, most suppliers find their perfect order **percentage** to be somewhere between 10 and 20 percent," Morgan adds.

Procter & Gamble takes an even more stringent approach to measuring its perfect order **percentage**.

"We employ each of these four measures, and if any order misses on any one...

...out.

Before most suppliers can get to determining how they will score their perfect order **performance**, Morgan adds, many run into a more basic problem: their inability even to measure each...

...of what ECR is all about, addressing the key elements of the interface between the **supplier** and distributor.

"If you can do perfect orders, it means you must have a good...making a fact-based decision on which option will be most mutually beneficial to the **supplier** and distributor," he says.

This same focus on results measured in terms of consumer take-away

is

also starting to creep into some salesforce **performance** measures, according to Sauer.

"Specifically, I have two clients that are moving from traditional volume...

...blending different systems for a time. In the first year, for example,

they may weight **performance** measures to count shipments as 90 percent of the measure, and consumption as 10 percent...

...other ways to get away from the total reliance on shipments as the key sales **performance** indicator, he points out.

"You can look at various measures around account contribution, account profitability...

...also looking at ways to reward individual team members differently, depending on which aspects of **performance** they have the most ability to influence or control.

One way this can be accomplished...

...other hand, the incentive may be weighted to count share as 50 percent of their **performance** measure, shipments as 25 percent, and 25 percent for consumption."

Other measures that may also...

...time frame for measurement and reward, looking for longer time horizons than the typical quarterly **performance** measure.

"This is critical for companies implementing category management best practices, both among suppliers and retailer/distributors," he points out.

Whatever specific **performance** measures are instituted, Troyer and other consultants are firm in stressing that they must be...

...or compensation systems.

"Otherwise you won't get the behaviors you need to achieve the **performance** goals," Troyer comments.

"In the customer service area, for example, you could incent a person ...

...customers would see would probably be pretty dramatically different, based on which of those two **performance** measures you used."

"The classic example," Donnan adds, "is saying to a salesperson, we're ...

...profit as though they are a small business, rather than to manage to a

quarter- end goal of pushing inventory out the door, and having a fairly loose pile of change...

...s measurement systems are another of the key obstacles preventing companies from moving into new **performance** measurement systems more quickly, Harris believes.

"There's a concern that if you move to a more balanced scorecard, you might very well cause a disruption in the present **performance** of the business, because you will need to wean people away from certain short-term ...

...order to run our business a different way," Harris says.

"Unfortunately, however, most senior management **performance** measures are themselves still disproportionately based on short-term quarterly targets, which can make them...

The impact of electronic data interchange on delivery performance

...ABSTRACT: past results. Results indicate that the extent of EDI use
is
significantly related to delivery **performance** after controlling for
the
considered factors. Furthermore, the data set supported the moderating

effect of production instability on the relationship between the extent of EDI use and delivery **performance** achieved, but failed to support the moderating effect of organizational size.
TEXT: THE IMPACT OF ELECTRONIC DATA INTERCHANGE ON DELIVERY **PERFORMANCE** *

After several years of use of electronic data interchange (EDI) in various industries, the literature...

...results. Our results indicate that the extent of EDI use is significantly related to delivery **performance** after controlling for the above-mentioned factors. Furthermore, the data set supported the moderating effect of production instability on the relationship between the extent of EDI use and delivery **performance** achieved, but failed to support the moderating effect of organizational size.

(ELECTRONIC DATA INTERCHANGE; MANAGERIAL PRACTICES; SUPPLY CHAIN MANAGEMENT; DELIVERY **PERFORMANCE**)

1. Introduction

A supply chain is an integrated system wherein a number of business entities...

...1995) argue that the use of EDI is expected to yield higher on-time delivery **performance** , yet only a few empirical studies have been conducted in this regard. Findings of these...

...e.g., Srinivasan, Kekre, and Mukhopadhyay 1994) relationships between the use of EDI and delivery **performance** , others have not (e.g., Walton and Marucheck 1997). Although a research framework may make...

...We therefore choose a manufacturing plant as the unit of analysis and use the delivery **performance** of that plant to evaluate the effectiveness of EDI. Our study builds on the theoretical...

...recognizes the contextual factors at the plant level.

In the following sections, we discuss delivery **performance** measures. Next, we identify the contextual factors that can impact delivery **performance** of a plant. Last, we present the hypotheses to be tested.

2.1. Delivery **Performance** Measures

There is no consensus in the literature as to which **performance** measure should be used to evaluate the impact of EDI. In the past, a

multitude...

responsive to the customers' needs (Fisher, Hammond, Obermeyer, and Raman 1997). We therefore track delivery **performance** of an organization to evaluate the impact of EDT.

A manufacturer can be responsive to...

...time between start of the first step of production of a product/part and the **end** of the last step of production of that product/part) and lead time (the elapsed...

...diverse production processes. Another measure that has been used to assess responsiveness to customers is **on - time delivery** (Walton and Marucheck 1997). We choose to use this measure for our study because the...

...production processes in the plant do not confound this measure.

Also,

our choice of this **performance** measure is driven by the fact that the effect of EDI on achieving **on - time delivery** has been inconclusive in

the literature (Srinivasan, Kekre, and Mukhopadhyay 1994; Walton and Marucheck 1997). Nevertheless, **on - time delivery** is only one of many

measures that could be used to evaluate the impact of...

...the readers to interpret the results with this in mind.

2.2. Factors Affecting Delivery **Performance**

PRODUCT DIVERSITY. The number of final product configurations offered by an organization imposes additional constraints...

...complexity and consequently lead to coordination problems (Kekre, Murthi, and Srinivasan 1995). Therefore, the delivery **performance** of an

organization can be negatively affected by its diverse product portfolio.

PRODUCT CUSTOMIZATION. The extent of product customization done in a plant

can also impact its delivery **performance**. Product customization, by its

very nature, requires one-to-one interaction with the customer. Customer requirements...

...sources can increase production instability and are expected to have a

negative impact on delivery **performance**.

SIZE OF THE ORGANIZATION. The size of an organization probably does not have a direct bearing on its delivery **performance**. However, in the context of adoption and use of EDI in an organization, size can...

...needs to be controlled in a study that investigates the relationship

between EDI and delivery **performance** .

JUST-IN-TIME (JIT) MANAGEMENT PRACTICES. An organization using JIT management practices constantly strives to...
...extent of use of JIT management practices is expected to have an impact on delivery **performance** . Many organizations have employed both JIT and EDI to achieve better delivery **performance** . In such situations, any improvement in delivery **performance** should not be attributed to EDI if indeed it accrues due to JIT (Mukhopadhyay 1993...

...should be taken in the research design to isolate the effect of JIT on delivery **performance** prior to investigating the impact of EDI on delivery **performance** .

QUALITY MANAGEMENT PRACTICES. Like irr, quality management practices also integrate the supply chain by establishing a close relationship with the **supplier** and emphasizing customer focus (Flynn, Sakakibara, and Schroeder 1995). Quality management efforts ensure a predictable...

...proactive quality management program in place is expected to have a positive impact on delivery **performance** .

From the above discussion it is apparent that the factors mentioned can influence delivery **performance** . Therefore, the impacts of these six factors need to be removed before we investigate the relationship between the use of EDI in an organization and delivery **performance** achieved by that organization.

2.3. Hypotheses

EDI provides integration among the elements of the...

...to react to recent changes. Therefore the use of EDI is expected to improve delivery **performance** .

H1. After controlling for the contextual factors, a plant using EDI will have higher delivery **performance** than a plant that does not.

The hypothesis H1 refers to whether a plant uses...

...dichotomous condition. But, the extent of EDI use, a continuous variable, should also affect delivery **performance** thereby leading to a second hypothesis.

These days many organizations have adopted EDI. However, the...

...plant that uses EDI for most of its transactions is expected to have higher delivery **performance** than a plant that seldom uses EDI.

H2. After controlling for the contextual factors, the extent of use of EDI

will be positively related to delivery **performance** .

Uncertainty, such as unpredictability in demand, unreliable suppliers, poor coordination among departments, and consequently production...

...the one with the higher degree of EDI use is expected to have superior delivery **performance** .

H3. After controlling for the contextual factors, for a given level of production instability, the higher the extent of use of EDI the higher the delivery **performance** achieved.

Historically, EDI has been implemented using a hub and spoke arrangement.

Large organizations (the...

...a similar contention. In their analysis, they find that "... regardless of its cost structure, a **supplier** may have to join the EDI network out of 'strategic necessity,' due to the presence of an IT-efficient **supplier** . Our analysis further shows that depending on the

supplier competition structure, the EDI system may prove to be a 'beneficial' strategic necessity for a large **supplier** and an 'unfortunate' strategic necessity for a small **supplier** " (Barua and Lee

1997: p. 398). Building on similar arguments, Raymond and Bergeron (1996)

deduce...

...systems are imposed. Therefore, according to the studies cited above,

the benefit (such as delivery **performance**) gained by larger and ...for

the contextual factors, the relationship between the extent of use of EDI

and delivery **performance** achieved by an organization will be moderated by

the size of that organization.

In a...

...segment of the supply chain that we investigate in this study is bounded

on one **end** by one link upstream from the manufacturer and on the other

end by one link downstream from the manufacturer.

3. Research Design and Methodology

3. 1. Data...

...in another plant included in the survey. This variable was, therefore, measured by the average **percentage** change in plant output (in terms of respective currency) from one month to the next...

...and is denoted by EXTEDI. This variable is measured by averaging two objective responses: (1) **percentage** of purchase orders sent to suppliers by means of EDI, and (2) **percentage** of customer orders received via EDI

Therefore, this measure of EDI use takes into account...the broad construct QUALITY. These scales include the following: customer focus, feedback, process control, and **supplier** involvement. Reliability and unidimensionality analyses were done as described above (see Appendix). Finally, these scales...

...QUALITY.

ON-TIME DELIVERY (ONTIME). Operationally, we used an objective measure to track the delivery **performance** of a plant. The respondent was asked to report the **percentage** of orders that were shipped on time in the last one year period according to...

...of 0.09. Therefore, the non-managerial factors do in fact have influence over delivery **performance** as was theorized earlier and hence need to be controlled.

TABLE 2

The managerial contextual...

...for our previous argument that managerial contextual factors such as irr and QUALITY affect delivery **performance** and hence need to be controlled in addition to the non-managerial factors. Our argument...

...implies that there is a relationship between the use of EDI and on-time delivery **performance**, and this relationship is significant even after removing the effects of contextual factors (both non...

...and managerial). That is, the plants that used EDI were found to have higher delivery **performance** than plants that did not, thereby providing support for Hypothesis 1.

Product diversity (PDIVERS) remained...

...is found to be negative. This implies that it is hard to achieve superior delivery **performance** for a plant that sells a large number of

products to customers compared to a...

...efforts put into Just-In-Time and quality management practices are stronger predictors of delivery **performance** than size of the organization. Also, it is important to note that both the managerial...

...step 3. This reinforces our argument that these managerial practices have an impact on delivery **performance** and need to be controlled before

investigating the impact of usage of EDI on delivery **performance**.

Otherwise, the result we observe may be a confounded result.

The second set of hierarchical...the plants that use EDI, the extent of EDI

use is positively related to delivery **performance**.

TABLE 3

Two interaction terms, EDI * INSTBL, and EDI * SIZE, are entered in the last...

...of production instability, the higher the extent of use of EDI, the higher the delivery **performance** achieved. Previous studies have argued

that the adoption of EDI is expected to be high...

...by greater instability (Germain and Droge 1995). However, whether such

adoption leads to better delivery **performance** remains to be seen. Our study, therefore, extends the literature further along this line.

Looking

...

...an organization is inconsequential with respect to the success of EDI in

achieving superior delivery **performance**. It is the extent of EDI use that

determines the level of delivery **performance** achieved regardless of the

size of the organization.

TABLE 4

On the other hand, we...

...in this study support the contention that the use of EDI leads to better

delivery **performance**. Most of the previous studies have used perceptual

measures or indicator variables to assess delivery **performance**. While such measures can be good choices in certain situations, perceptual measures are prone to...

...sub-optimal strategy. In this study we have used an objective measure to

assess delivery **performance** of the organizations. This measure takes into account the EDI link in both directions placing...
...that linking up with customers and suppliers through EDI will improve their on-time delivery **performance** (% of orders delivered on time). This is particularly true when managers face production instability. Moreover, managers can gain additional improvement in on-time delivery **performance** by using EDI even when they already have quality management and/or Just-In-Time...

...directions. First, researchers should study the longitudinal effects of EDI, thereby: establishing the relationship between **performance** and EDI before and after EDI implementation. They can also enrich the research findings of...

...findings, future research should examine the effects of EDI and web-based technologies on other **performance** variables such as cost, quality, and delivery speed. Finally, future research should investigate the effects...

... easily upgrade to the new SmartStation and realize the benefits of total interoperability. We will **begin shipping** these new products towards the **end** of this quarter or in next quarter, and in the meantime, we are embarking on...

... have turned a corner here. In January, we also announced the divestment of our 50 **percent** ownership and LIS, the joint venture we hold with Leica Microsystems in Singapore. At the...

... split by region. A bit more than half of our revenue comes from Europe, 28 **percent** from the Americas and 20 **percent** from Asia. Despite the weakening U.S. dollar, the United States and Asia had experienced...

... over the last 9 months. In local currencies, both regions have grown well above 20 **percent** growth, with particularly high growth rate in Surveying & Engineering. But also, the growth of 8 **percent** in Europe is an acceptable result, given the current economic environment in this region. Let...

... division for the quarter. The proportion of S&E sales remains essentially unchanged at 63 **percent**. Our largest division also remains our most profitable one, which continues to positively influence the financial **performance** of the company as a whole. If you will turn to slide 7, let me...

...division. As I stated earlier, Swiss franc sales in S&E rose by over 16 **percent** in Q3 by 20 **percent** in local currency. Growth was robust in most regions, particularly in the Americas and in Asia, where local currency sales grew by almost 30 **percent**. We have clear indications that the S&E division continues to gain market share, particularly...be at their midterm target level, with an EBITDA margin this quarter of 19.6 **percent**. Although the weaker U.S. dollar has an impact on

topline

performance , we have a natural dollar hedge that largely protects our profit in the S&E...

...franc sales of 22.3 million in Q3, which represents a decline of 4.1

percent against the previous year. But in local currencies, however, sales increased by 5.2 **percent** . We had an excellent quarter in the sensor business of the division, with particularly solid...

...first 9 months year-to-date, we have seen Swiss franc revenues growth of

7 **percent** , which we believe is a sustainable level going forward. In terms of earnings in the...

...amortization. EBITDA for the quarter was at 1.7 million Swiss francs, or

7.8 **percent** of sales, compared with 0.3 million, or 1.2 **percent** of sales in the previous year. Let's now turn to slide 9 and the...

...slight decline compared with the previous year. Currency adjusted sales,

however, grew at around 2 **percent** . As anticipated, sales growth has begun to level off as the market for the current...

... contributed to the improvements in earnings during the quarter. EBITDA

margins increased to 21.1 **percent** in the third quarter, primarily as a result of the positive gross margin developments through...

...sharply in Q3, with sales of 19.6 million Swiss francs representing more

than 50 **percent** sequential growth over Q2, and 6.8 **percent** growth over

Q3 of last year. Sales in local currencies increased even by over 13

percent in Q3. Demand was not only strong in Q3, but we also have a healthy...

...EBITDA margin of 15.7, bringing the year-to-date margin up to 7.6

percent . Let's now move to slide 11 and the results of the HDS division.

The can see the **performance** of our Special Products Division. The Special

Products Division recorded sales from continuing operations of...
